### Overview

This 4 circuit robust source controller is fully rated for 4 x 20 Amp of continuous inductive lighting loads. Whether used for tungsten, low voltage or cold cathode light sources, this unit will provide reliable service over many years. With a 128 scene integral memory, this device offers multiple control options, to meet the most demanding specifications.

In addition to the iLight iCAN network connectivity, it also has an audio visual port, and panic/fire alarm input. It is typically used on its own in small areas that need manageable and controlled light such as board rooms, restaurants and lecture theatres, or as part of a comprehensive network in large building complexes.
