

CA SERIES

CA40, CA120, CA120 HZ

AV INTEGRATION MICRO-AMPLIFIERS

The **CA40** and **CA120** are stereo amplifiers with a tiny size but amazing remote control features: serial RS-232 port, IR receiver and 0-10 VDC remote port.

CA120HZ is the high impedance version of the CA120, delivering 120W @ 70/100V line level, a technology which is especially suitable for long loud-speaker wire runs and/or an amount of loudspeaker units far beyond the 2 or 4 units typically connected to a low impedance amplifier. They're an ideal solution in those audiovisual applications which require integration with external control devices: education classrooms, meeting rooms, multimedia presentations, retail shops, etc.
