CablePort desk²

Technology meets design

Today conference and office furniture must feature mains, network and multimedia interfaces for the use of digital media. The new CablePort desk combines technology, functionality and a top design.

The plain style and the striking radius of the curving metal parts contribute to the unique design. The flexible clamp mechanism of the CablePort desk² guarantees its universal use in the modern office world. Mains and data cables can thus be fixed to the desktop as required, without causing any damages. A cable chain guides the cables from the desk to the floor box or wall channel.

- Individual configuration possible with Konnect flex click 45 Multimedia adapter plates
- In addition media control, switches, EnOcean button, USB recharger etc. available
- Two different lengths – with 4 resp. 6 mains sockets
- Anodized aluminium or powder-coated steel
- On demand with international mains sockets
- Fit for the future, new components can be integrated
- Concealed clamps for easy anti-slip mounting on desktops 10 – 60 mm thick
- Mains cable 1 m GST18 - Schuko (with models incl. mains socket only)

For desktops 10 - 60 mm
