

Bruce Nauman's award winning art debuts at MOMA Museum of Modern Art, NYC.

Congratulations to Contemporary American artist Bruce Nauman who last year won the coveted Golden Lion award for best national participation at the 53rd Venice Biennale for his latest creations titled Giorni and Days.

The Venice Biennale (Biennale di Venezia) is a major contemporary art event, held every two years in Venice, Italy. The 53rd International Art Exhibition titled "Making Worlds" was the largest ever, with 77 nations hosting art pavilions, including first-time exhibitors United Arab Emirates and the Vatican. Nauman's win this year marks the first time an American has won the prestigious award since 1990.

Panphonics is extremely proud to have been selected by Mr. Nauman to help bring his exciting audio-visual artwork to life. This exhibition marks the second time Mr. Nauman has worked with Panphonics, having used Panphonics directional audio speakers in an earlier exhibition at the Tate Modern in the UK. The current piece unveiled at MOMA this summer uses Panphonics elements to create Bruce Nauman's unique art.

The ultraslim profile of Panphonics speakers allow them to be easily integrated into any environment (or exhibition). In addition, the unique audio properties of Panphonics speakers, enable artists and designers to deliver audio precisely where it is needed, and no place else.

Sound Shower® Directional Speakers

Sound Shower® directional audio speakers from Panphonics enable targeted audio content to be easily delivered to specific areas throughout any museum or gallery. Visitors can hear crisp, clear audio when standing within the target area, but the sound quickly disappears when they step away. A myriad of distinct audio applications can therefore be positioned close together without disturbing one another—even in open spaces—helping to create a memorable visitor experience.

The unique audio properties of Panphonics speakers, enable artists and designers to deliver audio precisely where it is needed, and no place else.

Panphonics is the world's leading provider of directional audio speakers. Founded in 1997 and headquartered in Finland, Panphonics delivers targeted audio solutions for acoustically demanding applications. Panphonics Sound Shower® directional audio speakers can be found in banks, retail stores, digital signage projects, museums, information kiosks, service stations, theaters, and offices throughout the world.
